

SHRUTI CHEDGE

Full-Stack Developer

Nagpur, Maharashtra, India • +91 7720051264 • shrutichedge@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with hands-on experience building scalable, production-grade web applications using React, Node.js, PostgreSQL, and MongoDB. Demonstrated ability to design and integrate REST APIs, implement real-time features via Socket.IO, and optimize database performance (20–30% query response time reduction). Quick learner with a collaborative mindset and a strong interest in backend architecture and distributed technologies.

WORK EXPERIENCE

Software Developer Intern | Chetan's Royals Webtech Pvt. Ltd., Nagpur Dec 2025 – Present

- Developed and maintained full-stack features for a live, client-facing product using React, Node.js, and Express.js, contributing across the entire development lifecycle.
- Designed and integrated RESTful APIs to improve system scalability, data flow, and inter-service communication.
- Optimized PostgreSQL and MongoDB queries resulting in a 20–30% reduction in API response times, improving user experience on high-traffic endpoints.
- Participated in Agile ceremonies including sprint planning, daily standups, and code reviews; supported deployment pipelines and production releases.

PROJECTS

SafePulse — React · Node.js · Express · MongoDB Atlas · Socket.IO · Firebase FCM | [GitHub](#) | [Live Demo](#)

- Architected a real-time personal safety web application featuring live location sharing, emergency SOS broadcasting, and geofencing safe zones using a decoupled React + Node.js/Express client-server model.
- Engineered continuous location streaming via Socket.IO with throttled pings, and implemented geospatial boundary detection using MongoDB Atlas 2dsphere indexes and \$near queries powered by the Haversine formula.
- Integrated Firebase Cloud Messaging (FCM) for push notifications to trusted contacts on boundary-crossing events and SOS triggers, with the browser's native Contact Picker API for contact management.
- Implemented a zero-cost universal coordinate forwarding pattern for secure landmark navigation, avoiding premium mapping API fees while maintaining production-quality UX on a free-tier deployment.

Money Management Application — Python · Tkinter · MySQL | [GitHub](#)

- Built a cross-platform desktop application to track income, categorize expenses, and visualize budgeting trends through intuitive UI components.
- Designed a normalized MySQL schema for efficient financial data storage and retrieval, enabling fast reporting and analytics.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend	Node.js, Express.js, REST API Design, Socket.IO
Databases	PostgreSQL, MongoDB Atlas, MySQL
Tools & Workflow	Git, GitHub, Postman, Firebase FCM, Vercel, Render, VS Code

EDUCATION

B.Tech — Computer Science Engineering | G.H. Rasoni University

CGPA: 9.0 / 10

Class XII · CBSE: 74.8% | Class X · CBSE: 87%

INTERESTS & FOCUS AREAS

Backend Systems Architecture • Real-Time & Geospatial Engineering • Performance Optimization • Open-Source Contribution
